The Antioxidant and Multivitamin Formula is recommended for everyone as the basic foundation for insurance against nutritional gaps in the diet.*

The Antioxidant and Multivitamin Formula includes a vegetarian liquid capsule containing fat-soluble vitamins, mixed carotenoids, selenium and coenzyme Q10 as well as two (2) tablets containing water-soluble vitamins, bioflavonoids and minerals. Unlike other supplements, the Weil formula contains natural mixed tocopherols and palm tocotrienols, providing all eight compounds that make up the vitamin E complex.

"The vitamins, minerals, and micronutrients in my antioxidant and multivitamin formula were selected to provide optimal support for normal cellular processes, including defenses against free radicals, and to act as nutritional insurance against gaps in the diet. Put simply, antioxidants help safeguard your immune system, promote optimal aging, and protect your health!"

- Andrew Weil, M.D.
