

Dr Venessa's Anti-Aging 3™ Collagen powder is the first complete formula with Type I, II & III* collagen supported by a powerful amino acid complex of Proline, Lysine, Glycine and vitamin C.

Scientific research shows that these nutrients in the appropriate bio-chemical amounts may enhance the body's own collagen production for cell and structural renewal. Collagen renews damaged tissue due to disease and the natural progression of aging restoring a youthful look and skin tone.

These statements have not been evaluated by the FDA. This formulation is not intended to diagnose, treat, cure or prevent any disease.

Specially formulated by Research Scientist Dr. Titus Venessa, Ph.D., Sc.D. Manufactured exclusively for Dr. Venessa's Formulas™, Orlando, FL 32822, USA.
