FLEXSURE® IS CLINICALLY PROVEN SAFE & EFFECTIVE

Product safety is as important as product effectiveness. Vital g-Netics clinically tests all of our products using multiple testing methods to be certain our products are not only effective, but safe to use.

RESTORES THE BODY'S ABILITY TO PRODUCE ITS OWN GLUCOSAMINE, CHONDROITIN AND COLLAGEN NATURALLY*

Human Cartilage Cells

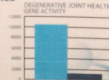

Before Flexsure
After Flexsure

INHIBITS THE GENES FROM ACTIVATING THAT CAN CAUSE LOSS OF MUSCLE MASS AND FURTHER JOINT DAMAGE*

Human Cartilage Cells

Before Flexsure
After Flexsure

AS WE AGE, KEY GENE FUNCTIONS CHANGE & WEAKEN THE BODY'S NATURAL JOINT REPAIR PROCESS*

Our bodies have genes that produce glucosamine, chondroitin and collagen to repair damaged cartilage and maintain joint health.* As our bodies age, the functioning level of the genes that produce these critical substances declines significantly, reducing our body's natural ability to repair damaged cartilage and maintain joint health.* Furthermore, our body creates a degenerative condition that can further reduce joint health whenever we suffer joint damage, or simply due to aging.* This condition can "switch on" other genes that cause joint inflammation and stress, and increase the loss of muscle mass and muscle performance.*

WHY IS FLEXSURE® BETTER THAN TRADITIONAL JOINT SUPPLEMENTS?

Taking glucosamine, chondroitin and collagen supplements provide limited benefits because our bodies have to digest, absorb, and process them. Producing these critical substances in our body is much more efficient and effective than taking supplements.* Flexsure is clinically proven to reactivate the body's natural ability to produce its own glucosamine, chondroitin and collagen, and help restore the natural joint repair process.* Flexsure also helps to protect against further joint damage and muscle loss!*
