

ENCHARGE is a dietary supplement used by male and female athletes during training, competition and recovery to immediately enhance endogenous (natural) phosphocreatine levels in skeletal muscle*.

ENCHARGE makes creatine work "faster and bigger". The **SiNERGY** complex makes creatine work faster enabling your nervous system and muscle cells to re-charge with high-energy compounds faster during and after exercise. The **MYOCHARGE** complex makes creatine work bigger because the unique creatine amino acid peptide molecules in **ENCHARGE** enhance muscle protein synthesis, strength and size.*

Warning: Consult a physician before using if you are unaware of your current health status, if you have a medical condition, or if you or your family has a medical history of cardiovascular disease, diabetes, psychological disorders, hormonal abnormalities, or if you are taking any prescription drug. This product is not intended for use by those with a serious medical condition or pregnant or lactating women. Discontinue use two weeks prior to surgery. Do not exceed maximum daily dosage. Do not use if safety seal is broken. For adult use only. **KEEP OUT OF REACH OF CHILDREN.**

* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Certified **SAFE™** (Safe and Effective First™)

ENCHARGE was clinically tested on athletes to confirm that it maintains normal physiological function (Safe) while improving performance (Effective). **ENCHARGE** contains no substance banned by national college sports associations, International Olympic Committee (IOC) or World Anti-Doping Agency (WADA).

Researched, developed, tested and distributed exclusively by **RIVALUS Inc.**
