240 Easy-to-Swallow Capsules

Andrew Lessman's PHOSPHATIDYL SERINE-PS BENEFITS provides a concentrated, stable source of Phosphatidyl Serine, an important phospholipid in all cell membranes of the body. Since Phosphatidyl Serine can only be found in very small amounts from dietary sources, we provide 100 mg of this very important nutrient. Phosphatidyl Serine plays a vital role in a multitude of processes throughout the body, including the health of the brain and nervous system, the integrity of cell membranes and the formation of other important phospholipids. Phosphatidyl Serine is found in highest concentrations in the brain and nervous system, where it plays a distinct and separate role from Phosphatidyl Choline, and is essential for nerve cell function and the production and release of neurotransmitters. Phosphatidyl Serine has been shown in numerous studies to help support positive mood, promote learning and concentration, help support memory and overall cognitive function and also help support the body's natural response to certain forms of stress. We also include high levels of the B-Complex vitamins and Vitamin C for additional support of the nervous system and because these nutrients are easily depleted during times of stress.

As we proceed through life, we are exposed to a multitude of stressful experiences and as we age, our memory and mental capabilities decline. This is a normal part of living and **Phosphatidyl Serine - PS Benefits** is designed to help support our body's normal and adaptive stress response while supporting mental clarity, memory and cognitive function.
