Typical Amino Acid Profile Per 25.5g Serving

Alanine	800mg
Arginine	400mg
Aspartic Acid	1910mg
Cysteine	220mg
Glutamic Acid	3000mg
L-Glutamine	1000mg
Glycine	400mg
Histidine	250mg
Isoleucine	1110mg
Leucine	1630mg
Lysine	1540mg
Methionine	330mg
Phenylalanine	530mg
Proline	1070mg
Serine	910mg
Threonine	1040mg
Tryptophan	380mg
Tyrosine	440mg
Valine	1040mg

The Protein Blend in Natural Whey contains the following supportive immunofactors:

48-52% beta-lactoglobulin
18-22% alpha-lactoglobulin
20-22% glyco-macro-peptide
2% immunoglobulins
0.5-1% lactoferrin

- No MSG
- No Aspartame or Acesulfame K

Contains milk and soy.

Contains NO peanut, tree nut, fish, shellfish, wheat, gluten or yeast.

Contains less than 1% soy lecithin.

This product is manufactured in a facility that produces other products that contain egg.

SPECIAL PROCESSING & BLEND

Natural Whey provides an optimal source of whey protein by combining an ultrafiltered, low temperature processed whey protein concentrate with cross flow microfiltered whey protein isolate. These specialized processing systems ensure a High Biological Value (HBV) whey source in the form of whole proteins in their biologically active state. **Natural Whey** is also remarkably high in Branched Chain Amino Acids (BCAAs), which are the most required amino acids needed to replenish muscle stores that are utilized during strenuous exercise.**

THE NEXT GENERATION PROTEIN

The biochemists at MRM® have taken protein supplementing to the next level without the worry of wasting ingested protein. The addition of **Digest-ALL® AP** helps breakdown long and short chain peptides into smaller, more readily absorbable amino acids for maximum absorption and retention.** **Digest-ALL® AP** helps the body release more amino acids directly into the muscles to increase muscle size, strength and lean body mass.**

ADDED L-GLUTAMINE

Natural Whey also contains 1g of L-Glutamine (in addition to naturally occurring L-Glutamic acid) per serving to decrease recovery time following exercise.**

SUPPORTS IMMUNE HEALTH

Specific characteristics of whey proteins have shown an ability to support immune health.** Whey protein contains high amounts of cysteine and other substrates used in the synthesis of Glutathione.** Glutathione is a major antioxidant and supports immune health.**
