

ENGAGE: VERB TO OCCUPY YOUR ATTENTION AND EFFORTS

TROXYPHEN® ENGAGE Contains legit doses of premium and studied ingredients so you can smash your next training session and get results faster than ever.

SUGGESTED USE: Mix one scoop with 6-8 oz. of cold water and consume 15-30 minutes prior to physical activity.

WARNING: Do not use if you are sensitive to caffeine, pregnant or nursing a baby, under 18 years of age, have any known or suspected medical conditions, and/or if you are taking any prescription or OTC medications. ENGAGE is an incredibly strong pre-workout matrix that contains 300mg caffeine per serving, the equivalent of approximately 3 cups of coffee. Avoid using with any other caffeinated products. Too much caffeine may cause nervousness, irritability, sleeplessness, and, occasionally, rapid heartbeat. Always begin use with 1/2 scoop or less and assess your tolerance. Once tolerance is assessed, take a maximum dose of 1 scoop. To avoid sleeplessness, do not consume within 6 hours of bedtime. **KEEP AWAY FROM CHILDREN STORE IN A COOL DRY PLACE**

TROXYPHEN® ENGAGE

PRE WORKOUT IGNITER

Nitrosigine™ (Nitric Oxide) has shown blood vessel relaxation 5x greater than Arginine HCL. Enhanced blood flow during and after exercise aids in muscle growth and recovery.

HydroMax™ is a uniquely optimized compound that provides 12x more glycerol by weight. At proper doses, glycerol enhances plasma and intramuscular volume expansion, producing a more extreme pump and vascular look every time you train.

Advantra Z® is the subject of over 30 research studies with participants reporting that exercise was easier 83% of the time. Intensified exercise tolerance means you can ENGAGE harder for longer.

AlphaSize® boosts mental focus and improves reaction time during training sessions. AlphaSize® has also been shown to support muscle strength, power and endurance; including studies showing 114% increase in bench press force.

Huperzine A maintains higher levels of acetylcholine, which is important support for enhanced mental acuity, focus and drive.

SUPPLEMENT FACTS

Serving Size: 5 Grams (1 Scoop)
Servings Per Container: 20

Amount Per Serving	% DV
Calories	5
Creatine Hydrochloride	2,000 mg **
Hydromax™	700 mg **
