

St. John's Wort (*Hypericum perforatum*) is an herbal extract that has been used in Europe for years.** This material has been standardized to contain 0.3% Hypericins, known active components contained in the herb. Research has indicated that hypericins interfere with particular enzymes in the brain that inhibit the "feel good" neurotransmitters such as serotonin, epinephrine and dopamine.** **St. John's Wort** is an effective nutritional supplement to support today's stressful lifestyles.**

- Enhances Mood & Well-Being**
- Supports a Positive Mental Outlook**
