360 Easy-to-Swallow Capsules

Andrew Lessman's VITAMIN D₃-2500 contains 2,500 IU of what is now recognized as the most important single vitamin to consider supplementing – **Vitamin D₃**. Everyone recognizes the unquestioned role of Calcium in bone health, yet few of us realize that without Vitamin D, we cannot absorb Calcium and we cannot enjoy Calcium's benefits. In short, Vitamin D is just as important as Calcium to bone health. That should be enough to encourage everyone to focus on Vitamin D, but it's Vitamin D's other benefits that has made headlines and has experts seeking to raise the recommended intake of Vitamin D. Historically, the body can manufacture limited amounts of Vitamin D when exposed to sunlight (via UV radiation); however, the aging process combined with our reduced sun exposure and increased use of sunscreens makes our body's current production of Vitamin D inadequate and unreliable at best. Unfortunately, Vitamin D is also not abundant in food, and is only present in very limited quantities in some fish and eggs. Recognizing this, we have always given higher levels of Vitamin D₃ in our multivitamins and also included Vitamin D₃ in all our Calcium and bone health products for over 30 years. The latest research on Vitamin D₃ validates the wisdom of the extra Vitamin D₃ we have always provided while also serving to encourage our decision to further increase those levels. Best of all, our **Vitamin D₃-2500** is a pleasure to use, since it comes in a small, soft, easy-to-swallow capsule and is designed to be gentle even to the most sensitive stomachs.
