

**SUGGESTED USE** Consume two capsules daily with food or as recommended by a health care professional. For best results, take this product with food, preferably a complete meal containing a small amount of fat. This product is most effective when used in conjunction with a high potency, comprehensive multi-vitamin-mineral supplement such as one of **ANDREW LESSMAN'S Life Rx™** formulas. **For answers to questions about the use of this product call 800.800.1200.**

**WARNING** Unless directed by a physician, Vitamin K is not for use with any anticoagulant drugs (Coumadin, Warfarin, Heparin, etc.). If you have ever experienced any blood clotting abnormalities, consult with a health professional before using this or any Vitamin K-containing product.

# ULTIMATE CALCIUM INTENSIVE CARE™

**GENTLE, ULTRA-SOLUBLE CALCIUM  
 WITH VITAMIN D3 AND VITAMIN K**

250 Easy-to-Swallow Capsules

**Andrew Lessman's ULTIMATE CALCIUM INTENSIVE CARE** is a mild all-natural formula designed to address the special requirements of virtually all individuals, particularly women, to consume extra **Calcium** and **Vitamin D<sub>3</sub>** to support bone health. This mild, easy to absorb formula is particularly important for women who have challenges with ordinary calcium tablets, but must consume **Calcium** and **Vitamin D<sub>3</sub>** to build and maintain a strong, healthy skeleton. **Calcium** is one of the most abundant minerals on our planet, yet it is sadly lacking from our diet and equally difficult to absorb. It is also critical to remember that without **Vitamin D<sub>3</sub>**, which is just as scarce as **Calcium**, we cannot absorb and utilize what little **Calcium** we manage to consume. In fact, inadequate **Calcium** and **Vitamin D<sub>3</sub>** intake poses a very real and substantial threat to the long-term health of our bones and bodies in this country. Making matters worse is the fact that **Calcium** itself is relatively insoluble and very hard to absorb from supplements, particularly those large calcium tablets. At **PROCAPS LABS**, we overcome this problem by placing ultra-fine, super-soluble, powdered forms of **Calcium** into small, easy-to-swallow capsules that are guaranteed gentle even to the most sensitive stomach. This eliminates the chalky taste, poor absorption and stomach upset that make ordinary calcium supplements so unpleasant to use. In order to support bone formation and preservation, we also include **Vitamin K<sub>1</sub>**, which is important for **Calcium** transport throughout the body. Because of its ultra-fine powder and super-soluble ingredients, our **Ultimate Calcium Intensive Care** remains mild despite delivering 500 mg of **Calcium**, 500 mcg of **Vitamin K<sub>1</sub>** and 1,000 IU of **Vitamin D<sub>3</sub>** in two small easy-to-swallow capsules. As we get older, the **Calcium** we require becomes more difficult to absorb and tolerate, but **Ultimate Calcium Intensive Care** makes it easy to provide the **Calcium**, **Vitamin K<sub>1</sub>** and **Vitamin D<sub>3</sub>** necessary to support the health of your skeleton while still remaining mild, even to the most sensitive stomach.
