360 Easy-to-Swallow Capsules

Andrew Lessman's MAXIMUM ESSENTIAL OMEGA-3 is our highest potency blend of Omega-3 oils with NO contaminants, NO mercury and NO fishy aftertaste. Our Omega-3 also exists in its most active, natural form rather than that of less desirable ethyl esters. Just as vitamins are required for life, Omega-3s are also essential for human life and are critical to our most vital organs making up our trillions of cell membranes. Since Omega-3s cannot be made by the body, their benefits are only available from a diet rich in cold-water fish or with a formula like **Maximum Essential Omega-3**. Research has shown that diets rich in Omega-3s are associated with superior heart, brain, circulatory and general health; yet sadly, the American diet lacks the Omega-3s necessary for even the most basic health considerations. Our **Maximum Essential Omega-3** provides a uniquely concentrated source of both fish and flaxseed oils, delivering our highest levels of all-important DHA (Docosahexaenoic Acid), plus EPA (Eicosapentaenoic Acid) and ALA (Alpha Linolenic Acid). The heart benefits of DHA and EPA are well-known, but discovering DHA's central role in brain and eye function is an enormous breakthrough. Sadly, typical Omega-3 formulas focus on less costly EPA rather than more important DHA, but our **Omega-3s** target vital **DHA**, which is essential for brain and eye function. In fact, the most critical, highest functioning areas of the brain and the eye (retina and macula) require ultra-high levels of DHA. Fish oil supplements have long been praised for their countless health benefits, but are equally well-known for their nasty aftertaste and contaminants; however, our **Maximum Essential Omega-3** allows you to enjoy all the benefits of fish oil with NO mercury, NO contaminants, NO stomach upset and NO fishy aftertaste.
