12 MG LUTEIN • 4 MG ZEAXANTHIN

MAXIMUM EYE SUPPORT®

**BILBERRY • ELDERBERRY • GREEN TEA • GRAPE SEED
BIOFLAVONOIDS • GAMMA & ALPHA TOCOPHEROL**

DIETARY SUPPLEMENT

60 Perma-Fresh Packets™ • 180 Easy-to-Swallow Capsules

NEW PERMA-FRESH PURPLE PACKETS • MOISTURE OXYGEN UV PROTECTION

THE PERFECT PACKET.
The New Perma-Fresh Purple Packet. The Only Packet Worthy of Our 100% Pure Products.

Our new **Purple Packet** is our most advanced packet ever, offering you even more protection than our original **Perma-Fresh Foil Packet**. To retain potency, vitamins must be protected from light, moisture and oxygen and the ordinary clear packets used with typical vitamins fail miserably to do so. Our newly developed **Purple Packets** are constructed from multiple layers of specialized materials to safeguard your vitamins from damaging light, moisture and oxygen. For decades, our **Perma-Fresh Foil Packet** set the standard for vitamin protection and today, our new **Perma-Fresh Purple Packet** takes that protection to even higher levels, giving the world's finest vitamins the special protection they deserve.

Andrew Lessman's MAXIMUM EYE SUPPORT is a comprehensive high-potency blend of more than a dozen targeted nutrients, phytonutrients and anti-oxidants to support healthy vision and protect the delicate tissues of the eye. It contains our highest levels of Lutein, Zeaxanthin and Bilberry, arguably the most important nutrients for eye health. Lutein and Zeaxanthin are two powerfully protective, naturally occurring carotenoids and when consumed, they will be most highly concentrated in the lens and macular region of the retina. **Maximum Eye Support** provides 12 mg of Lutein, which is dozens of times more than most leading multivitamins. It also contains 4 mg of Zeaxanthin – just as important as Lutein, but ignored by the leading multivitamins and only found at low levels (if at all) in most eye formulas. Lutein and Zeaxanthin offer Mother Nature's most powerful protection from light-induced oxidative damage. These two remarkable ingredients were naturally designed to protect the lens and macula region of the retina from UV radiation, Blue Light and other oxidative assaults. Lutein and Zeaxanthin can be concentrated to protect vulnerable eye tissues, but since they cannot be produced by the body, their benefits are only available from food or supplements. Given the low levels of Lutein and Zeaxanthin in the American diet, supplementation is a vital consideration. **Maximum Eye Support** also contains a high potency blend of Bilberry and Elderberry Extracts standardized for Anthocyanins, which are the deep purple protective anti-oxidants that also help to maintain healthy night vision by supporting the regeneration of the visual purple portion of the retina. **Maximum Eye Support** also provides the protection of high levels of not just Alpha Vitamin E, but the even more protective and all-important Gamma Tocopherol – both are well-known for their protective benefits to delicate eye tissue. We also provide high levels of our Green Tea Extract standardized to deliver exceptionally high levels of EGCG (Epigallocatechin Gallate) to further protect the fragile tissues of the retina from oxidative damage. Our standardized Grape Seed Extract is rich in OPCs (Oligomeric Proanthocyanidins) and is combined with our Citrus Bioflavonoid Extract to offer targeted support to the vital and delicate circulation to the eye. No eye formula would be complete without the well-known, well-researched and well-established benefits of our mild, non-acidic Vitamin C. Our quality of life depends on healthy eyes and vision and our **Maximum Eye Support** provides Mother Nature's best tools to protect the lens, retina, macula and other delicate tissues of the eye from a lifetime of oxidative assaults.

Always Wear UV-Protective Sunglasses Outdoors.
