What is the Tri Active Difference?...

- **14 Different Strains & Strengths**
- **6 Billion Live Cultures per Capsule**
- **Maximum growth potential**

TriActive Biotics, features Capsule-in-Capsule technology which is superior to other brands.

Our prebiotic releases in the gut where it flourishes, unlike competing delayed release (D/R) caps. Probiotics release in the Prebiotic filled small intestine for superior nutrient absorption.

14 Strains of Probiotics are used covering all aspects of probiotic needs. This ensures consumers get the full spectrum of health benefits.

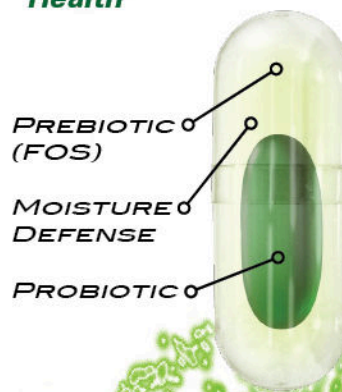

* This product was manufactured in a GMP approved facility.

* These statements have not been evaluated by the FDA. This product is not intended to prevent, treat or cure any disease. The efficacy of this product has not been confirmed by clinical research, and traditional uses do not establish that this product will achieve any claimed result.

ADVANCED DELIVERY SYSTEM

TRI ACTIVE BIOTICS

- **Innovative 3 Stage Delivery***
- **Immune Support / Digestive Health***

Dietary Supplement

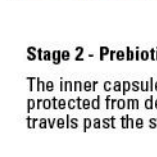

30 DAY SUPPLY

How Our Advanced Multi-Step Delivery Works!

Stage 1 - Prebiotic Release

TriActive releases a liquid prebiotic into the stomach where it balances the pH in the gut, discourages the growth of unfriendly bacteria, and establishes a path of food for the probiotic.

Stage 2 - Prebiotic Protection

The inner capsule of probiotic is protected from degradation and travels past the stomach.

Stage 3 - Probiotic Delivery

Tri Active probiotic is released into the intestine where the prebiotic has established a pathway of food for it to flourish. This gives you the maximum rate of bacterial multiplication which provides the highest benefit.

Featuring Advanced Probiotics

Probiotics are organisms such as bacteria or yeast that are believed to improve health. Researchers believe that some digestive disorders happen when the balance of friendly bacteria in the intestines becomes disturbed. Probiotics can improve intestinal function and maintain the integrity of the lining of the intestines. These friendly organisms make up 70% of the human immune system.
