

DIRECTIONS

Add one slightly heaped scoop (approx. 30 grams) of **Low Carb Protein** to a 3-4 oz. glass of cold water, milk or juice. Protein supplementation is recommended between meals and/or immediately following your workout. **Low Carb Protein** mixes instantly, no blender or shaker required.

Low Carbohydrate Diet (Weight Management Program):

A recommendation of 1 scoop per day for those trying to increase their dietary protein intake while decreasing intake of carbohydrates.

SUSTAINED RELEASE WHEY PROTEIN COMPLEX

Low Carb Protein delivers a unique source of amino acids by combining an Ultrafiltered Whey Protein Concentrate, Instantized Calcium Caseinate, Cross Flow Microfiltered Whey Protein Isolate, and Glutamine. This unique blend offers a sustained release of "**Fast & Slow**" proteins, meaning that the amino acids enter the bloodstream at different rates. This allows for higher amino acid concentrations in the blood for longer periods of time, therefore, **increasing nitrogen retention**. **Low Carb Protein** is also remarkably high in Branched Chain Amino Acids (BCAAs), which are the most required amino acids needed to replenish muscle stores that are utilized during strenuous exercise.**

THE NEXT GENERATION PROTEIN

The biochemists at MRM have taken protein supplementation to the next level, without the worry of wasting ingested protein. The addition of **NITROZYME™** helps breakdown long and short chain amino acids into smaller, more readily absorbable amino acids for maximum digestion and absorption.** Some concerns with the popular "high protein diet" used by many bodybuilders and dieters is that the body is unable to naturally digest high amounts of protein at one time. **NITROZYME™** helps the body release more amino acids from ingested protein than digestive enzymes alone. So when individuals (men, women, seniors as well as athletes of all ages and sports) take **Low Carb Protein** enhanced with **NITROZYME™**, the body can absorb more free amino acids directly into the muscles to increase muscle size, strength and lean body mass.**

Each scoop of **Low Carb Protein** provides 23g of a unique protein blend of undenatured and easily digested and absorbable protein. This formula was designed to provide your muscles with all of the essential amino acids required for maximum muscle strength and development. **Low Carb Protein** mixes instantly, tastes delicious and is **ASPARTAME Free!**

**Naturally occurring in whey proteins & flavors.

Ingredients: Sustained Release Whey Protein Complex (Ultrafiltered, Low Temperature Processed Whey Protein Concentrate (milk), Crossflow Microfiltered Whey Protein Isolate (milk), Instantized Calcium Caseinate (milk), L-Glutamine, Soy Lecithin & **NITROZYME™** (a plant base proteolytic enzyme preparation containing bioactive peptidases derived from a vegan source)), Natural & Artificial Flavors, Xanthan Gum, Salt & Sucralose.

Contains milk and soy.

Contains NO egg, peanut, tree nut, fish, shellfish, wheat, gluten or yeast.

Contains less than 1% soy lecithin.

Delicious Vanilla Shake

NITROZYME™ -
Enzyme Complex that Enhances
Protein Absorption and
Maximizes the Benefits of
Ingested Protein

**Sustained Release
Protein Blend**
Maximizes amino Acid Delivery
to ALL Muscle Cells

Easily Digested

Low in Cholesterol

Rich in BCAAs & L-Glutamine

23g of Protein Per Serving
