

Omega-3 Nutrition as Nature Intended

Pure Alaska Omega Salmon Oil is an all-natural fish oil made from free swimming Alaskan Salmon found in the clean waters of the North Pacific. Our cold press extraction method is gentle, shielding the oil from damaging high heat, eliminating the need for additional refining or chemical treatments. The result is remarkably pure and naturally balanced Salmon Oil, delivering all omega-3 fatty acids as nature intended, along with naturally occurring vitamins A, D and E, and the antioxidant, Astaxanthin.

Why Wild Alaskan Salmon Oil?

Alaska salmon swim and feed freely in the clean, cold, & pristine waters of Alaska. As a result, they are naturally high in Omega-3 fatty acids and naturally free of heavy metals like mercury and lead. Omega-3 fatty acids help support and maintain healthy bones, joints, vision, immunity, mood, cognitive function, and most of all the heart and the cardiovascular system†. Alaska salmon are harvested in well-managed, sustainable fisheries – the first and largest sustainably certified wild salmon fishery in the world!

† Supportive, but not conclusive research shows that consumption of EPA and DHA Omega-3 Fatty Acids may reduce the risk of coronary heart disease.
