Andrew Lessman's MEMORY AND BRAIN is a unique blend of over 20 ingredients providing our most comprehensive natural support for the brain, memory and mental acuity. It also includes the most critical structural components for brain and liver cells. A human being's defining feature is our brain's remarkable abilities; yet as we age, we all experience significant changes in memory and brain function. This formula provides a long list of natural tools to help support the retention of our brain's extraordinary abilities, particularly as we age. Our brain requires an enormous supply of energy, so we begin with high levels of **Acetyl L-Carnitine (ALC)**. ALC is recognized for its role in energy production within the brain, while also being used to create **Acetylcholine** (our primary neurotransmitter). ALC is our first line of defense in combating the normal age-related changes in memory, concentration and mental acuity. Because our brain must have an uninterrupted supply of oxygen and nutrients, we include **Ginkgo Biloba** and **Vinpocetine** to support and maintain healthy blood flow to the brain, thereby ensuring the abundant resources necessary for optimum brain function. Both have also been shown to help combat those normal age-related changes in brain function. Two additional ingredients – **Bacopa** and **Turmeric (Curcumin)** have a long history of use in Ayurvedic (Indian) Medicine offering targeted protection to the delicate tissues of the brain. We also include **Vitamin D3**, since Vitamin D receptors are most concentrated in the highest functioning areas of the brain and adequate Vitamin D is essential for optimum brain function as we age. We also add high levels of all the **B-Complex** vitamins, particularly our unique B-12 given its essential role in brain and nervous system function. Additionally, since our sense of well being is a central part of mental function, we also include our unique standardized extract of **Panax (Asian) Ginseng**.

The three golden liquid capsules in each packet contain the phospholipids essential for healthy brain and liver function. The most important is **Phosphatidyl Choline (PC)**, which the FDA now recognizes as essential because of its scarcity in our diet and its vital role in our body. PC and all the other phospholipids are essential for the creation of all brain and liver cells, as well as the production of the nervous system's most important neurotransmitter – **Acetylcholine**. PC is also required to produce the vital protective sheath for our brain and nerve cells. The liver is arguably our hardest working organ and PC makes up two-thirds of its enormous internal surface area (almost 8 acres!) where it performs protein, fat and cholesterol metabolism, as well as processing all waste products (all alcohol and medicines) and almost single-handedly doing all the "dirty" work required to keep the body's internal environment healthy and "clean." Not surprisingly, the regenerative powers of the liver are unique among all internal organs and PC empowers the liver to rebuild and regenerate its hard-working tissues.

THE PERFECT PACKET.

*The Perma-Fresh Purple Packet.
The Only Packet Worthy of
Our 100% Pure Products.*

Our **Purple Packet** is our most advanced packet ever, offering even more protection than our original **Foil Packet**. To retain potency, vitamins must be protected from light, moisture and oxygen and the ordinary clear packets used with typical vitamins cannot do so. Our unique **Purple Packets** are constructed from multiple layers of specialized materials to safeguard your vitamins from damaging light, moisture and oxygen. For decades, our **Foil Packets** set the standard for vitamin protection and today, our **Perma-Fresh Purple Packet** takes that protection to the highest levels, giving your vitamins the special protection they deserve.

Supplement Facts

Serving Size 1 Packet (5 Capsules)	Servings Per Container 60	
Amount Per Packet	%DV*	
Calories 15
