

T-UP® Product Highlights

- *D-Aspartic Acid is clinically proven to raise testosterone in healthy males†*
- *Participants in a clinical study had a 42% testosterone increase in only 12 days†*
- *Only one daily dose needed†*
- *Supports muscle gains, strength and recovery†*
- *Full 30 day supply*

T-UP® Mega Testosterone Booster is raising the bar in natural testosterone elevation by bringing you scientifically researched D-Aspartic Acid. Unlike many products that claim to increase natural testosterone, our effects are real and supported by a clinical study¹.

¹ Topo et al., 2009, Reprod. Biol. Endocrinol. 200, 7:120. Study lasted 12 days and showed an average increase of 42% in total testosterone levels. The effects of D-Aspartic Acid on free testosterone were not investigated. Although only free testosterone provides the muscle enhancement and other benefits associated with testosterone, many experts agree that an increase in total testosterone is accompanied by a similar increase in free testosterone. Swerdloff et al, 2000, J Clin Endocrinol Metabolism 85: 4500.
