Get this in One Dose of Super Charge!® Xtreme

- Increases nitric oxide levels in the body---dilates arteries resulting in increased blood flow to muscles. Increased blood supply floods muscles with oxygen and nutrient-rich blood for greater muscle pumps and performance.
- Enhances mental focus during exercise--- Increases mental focus; improves reaction time and hand-eye coordination.
- Delays fatigue---Allows you to exercise longer without fatigue.
- Increases strength--- Increase muscular power.
- Increases muscle volume and lean body mass---starting with the first dose!
- Jump starts recovery--- puts recovery on hyper-speed so you get stronger, faster!

Phase 1 Energy & Pump (Hemo-dilation) Complex

Methylxanthines - Natural compounds that provide instant energy and mental focus to jump-start your workouts.

Pikotropin™ - A nootropic compound that increases blood flow to the brain and lessens mental fatigue. Improves hand-eye coordination and reaction time.

Nitrous Malate™ - a superior form of arginine designed to engorge your muscles with blood, improve nutrient delivery to muscle cells, and sustain whole body pumps.

Taurine - powerful muscle cell-volumizer which also aids in firing nerve impulses into your muscles.

N-Acetyl-L-Glutamine(NAG) - a superior form of glutamine that increases muscle volume and glycogen storage.

Phase 2 Strength & Endurance Complex

2CM™ Di-Creatine Malate - ionic-bound compound of creatine and malic acid that produces stronger muscle contractions and power.

Beta-Alanine/ L-Histidine Complex - Clinically proven to increase carnosine production in muscle. Helps normalize muscle pH so you can exercise longer and harder with less fatigue. Works synergistically with creatine to maximize lean body mass and reduce body fat.

Vinitrox™ - polyphenol complex that works synergistically with arginine to increase nitric oxide production and reduce oxidative stress.

Phase 3 Post-Workout Recovery Complex

Humanofort® - Natural embryonic peptide matrix designed to help the body increase testosterone production and decrease recovery time. Also contains naturally occurring IGF-1 and IGF-2 (insulin like growth factors 1 and 2), FGF (fibroblast), NGF (nerve growth), EGF (epidermal), and CTGF (connective tissue) growth factors.

Vinitrox™ is a trademark of Bio Serae Laboratoires SA

Other Ingredients: Maltodextrin, Natural & Artificial Flavors, Sodium Bicarbonate, Citric Acid, Sucralose, Natural & Artificial Colors.

Directions: Depending on the desired workout intensity, mix 1 scoop (Intense Workout) or 2 scoops (Super Intense) with 10-16 oz of water. Take on an empty stomach 15 minutes prior to working out.

To avoid sleeplessness, do not consume late at night. Do not exceed more than a 32g serving per day.

WARNING: Not for use by individuals under the age of 18. Consult a physician or licensed qualified health care professional before using this product if you have or have a family history of heart disease, thyroid disease, diabetes, high blood pressure, recurrent headaches, depression or other psychiatric condition, glaucoma, difficulty in urinating, prostate enlargement or seizure disorder, if you are using a monoamine oxidase inhibitor (maoi) or any other dietary supplement, prescription drug or over-the-counter drug containing ephedrine, pseudoephedrine or phenylpropanolamine (ingredients found in certain allergy, cough/cold, and weight control products). Exceeding recommended serving may cause serious adverse health effects including heart attack and stroke. Discontinue use and call a physician or licensed qualified health care professional immediately if you experience rapid heartbeat, dizziness, severe headache, shortness of breath, or other similar symptoms. Individuals who consume caffeine with this product may experience serious adverse health effects. Improper use of product may be hazardous to a person's health. Sale of this product to persons 17 years of age or younger is prohibited in Texas.
