

Superior Health Begins in the Digestive System

WHAT ARE PROBIOTICS?

Probiotics are beneficial bacteria that live in the intestines. Lactobacilli probiotics are most prevalent in the small intestine and Bifidobacteria probiotics are most prevalent in the large intestine (or colon). The average intestinal tract contains more Bifidobacteria than Lactobacilli.

HOW IS ULTIMATE FLORA DIFFERENT?

Ultimate Flora contains 10 different strains of beneficial probiotics (Bifidobacteria and Lactobacilli). Some other brands contain only Bifido or only Lacto. Since you have many different strains of probiotics in your intestinal tract, more strains (B's and L's) may be better.*

WHY TAKE ULTIMATE FLORA?

As we age, our level of Bifidobacteria declines. Ultimate Flora ADULT FORMULA contains more Bifido than Lacto to help maintain a healthy digestive environment.*

What to look for in a probiotic supplement:

- ✓ At least 10 probiotic strains
- ✓ High culture count with Bifidobacteria & Lactobacilli strains (B's and L's)
- ✓ Delayed release capsule
- ✓ Potency until time of consumption†

Brenda Watson is a leading expert on natural digestive care. Her Ultimate Flora probiotics are formulated to help balance the digestive system, and promote regularity and vibrant health.

The Ultimate Flora Probiotic Difference

HIGHER CULTURE COUNT

Ultimate Flora ADULT FORMULA 15 Billion is a daily maintenance probiotic formulated for ages 15 - 49. Each capsule contains 15 billion live cultures of 10 strains of beneficial flora.†

ONE CAPSULE PER DAY

To receive 15 billion cultures per day, you would need to take 6 capsules of a probiotic with 2.5 billion cultures per capsule!

Probiotics

DELAYED RELEASE CAPSULE

Stomach acid can destroy probiotics. Ultimate Flora vegetable capsules are designed to resist stomach acid more than standard capsules.

No Delayed Release

Capsule does not
resist stomach acid.

Ultimate Flora
Delayed Release

Capsule is designed
to resist stomach acid.
