AM Formula

• *L. casei*, *L. rhamnosus*, *B. infantis*, *B. bulgaricus*, and *B. longum* are all species of beneficial bacteria that reside in the human digestive tract, specifically the small and large intestines. These species were chosen because of their ability to support immune function and to address digestive issues.

MAKTrek Bypass® delivery system:

Exclusive to Country Life, this delivery system provides up to 50 times greater levels of beneficial bacteria to the small and large intestines than other standard probiotic or enteric coated products available on the market.

MAKTrek Bypass® Delivery System

Aids in the advanced delivery of probiotic supplement

PM Formula

• *L. acidophilus*, *L. paracasei*, *B. bifidum* and *Bifidobacteria* are species of beneficial bacteria that reside in the human digestive tract, primarily in the small and large intestines. These strains were chosen for their ability to support digestive function. They may also have a positive effect on the immune system.

ProBioFlax® delivery:

The beneficial bacteria in this formula are developed using flaxseed concentrate as the base material. The fiber contained in the flaxseed acts not only as a carrier, but also as a prebiotic, supporting the survival of the beneficial bacteria. This flaxseed concentrate supports important digestive processes while delivering the good flora.***
