

PROORENE™ is an all-in one complete power, endurance and muscle mass building powder with protein, carbohydrates, creatine, EFA's, Tongkat Ali, HMB, 5-Methyl-7-Methoxy-Isolavone and more! Whey protein has long been considered the "Gold Standard" of protein for serious athletes who work hard to develop and sustain a lean, strong and well-defined physique. Research studies support this belief. Athletes need more protein in their diet, often as much as twice the recommended daily allowance. The protein they choose makes a difference and here are several reasons why whey protein is a preferred choice for athletes of all types. PROORENE™ contains a pure, "instantized" whey protein processed through a series of low-temperature micro- and ultra-filtration steps, producing the cleanest, most intact form of whey protein from any single source. PROORENE™ is unsurpassed as a source of the essential amino acids required in the daily diet. Essential amino acids are the building blocks for healthy muscles, skin, nails and other body tissue.

Key features:

- Low in fat
- High in protein and complex carbohydrates
- All Natural Vanilla Flavor
- Fortified with creatine monohydrates and L-glutamine
- Contains a powerful complex that includes: EFA's, HMB, BCAA's, Deer Antler, Tongkat Ali, Rhodiola Rosea, Alpha Lipoic Acid, Octacosanol and 5-Methyl-7-Methoxy-Isolavone.
- Contains Glucosamine & MSM for joint support

How do I use PROORENE™?

SUGGESTED USE: Take 1 to 2 scoops daily with water, juice or beverage of choice. Best if taken one hour before or after training. Store in a cool, dry place.

NOTE: KEEP OUT OF REACH OF CHILDREN DO NOT USE IF SAFETY SEAL IS DAMAGED OR MISSING. **ALLERGEN WARNING:** CONTAINS MILK (WHEY), SOY (LECITHIN), AND MAY CONTAIN SHELLFISH DERIVATIVES (GLUCOSAMINE). **CAUTION:** Not recommended for individuals with allergies to dairy products and should not be used by pregnant or nursing mothers or children under 18 years of age without the advice of a physician. This product is intended to supplement the diet with additional protein and should not be used as a meal replacement. Not for use as part of a weight loss program without the direct supervision of a health care professional. Excessive protein intake may result in impaired kidney function.
