EFA Blend - This formula features a unique fatty acid blend consisting of healthy EFAs from flax, olive and other healthy oils, including CLA and MCTs. MCTs are quickly absorbed for energy, not stored as fat.

Carbohydrates - Now with 10 grams of waxy maize used for rapid glycogen store replenishment, a critical muscle recovery component.\* Amplified Muscle Meal delivers a total of 25 grams of multi-functional carbohydrates in each serving. That's 25 grams of essential energy to get you through your intense workouts and reload energy stores after

Essential Vitamins & Minerals - For an added bonus to help maintain good health and a competitive edge, this scientifically formulated nutritional supplement delivers 26 powerful nutrients your muscles need.\*

In addition to all of these benefits, our Amplified Muscle Meal is low in sugar and tastes great!

Amplified Muscle Meal contains a clinically studied whey protein. Compared to regular whey protein, the protein blend in Amplified Muscle Meal maximized amino acid absorption by delivering:

- → 107% More Total Amino Acids\* These critical amino acids are crucial to feeding your muscles before, during and after exercise.\*
- → 114% More Branched Chain Amino Acids\* BCAA are involved in reducing the amount of protein breakdown from exercise and help to preserve muscle glycogen stores.\*
- → 234% More Leucine\* Leucine is a key branched chain amino acid essential for fueling your muscles.\* Its key role is to help regulation of muscle protein synthesis during muscle building and recovery.\* This key amino acid is important for all types of athletes.
- \* In a randomized, double blind, placebo controlled cross-over study of 16 healthy male volunteers, subjects experienced significantly higher maximum concentrations of Total Amino Acids, Branched Chain Amino Acids and Leucine one hour post-ingestion of the protein blend in GNC Pro Performance® AMP Amplified Muscle Meal relative to amino acid concentrations measured post-ingestion of whey protein concentrate.

Amplified Muscle Meal is the perfect complement to any athlete's diet for maximizing

Keep your muscles fueled. Take Amplified Muscle Meal with a snack or with a meal. Amplified Muscle Meal can also be used as a superior post-workout nutritional formula.

> KEEP OUT OF REACH OF CHILDREN. Store in a cool, dry place.

Advanced anabolic muscle recovery formula

Dietary supplement

# IEW WITH MUSCLE FUELING VAXY MAIZE & HMB'

- → 50g of Whey & Casein Protein to Fuel Muscles
- → Micronized Protein & Amino Acids for Fast Absorption
- → Formulated to Enhance Power & Support Recovery'

▲ Clinically Researched

CHOCOLATE Natural + artificial flavors

NET WT 50.35 OZ (3.15 LB) 1430 G

DIRECTIONS: As a dietary supplement, add 3 level scoops to 12 - 14 fl. oz. of cold water, milk or juice and thoroughly mix in a shaker cup or blender. When miking with milk or juice, adjust nutritional information accordingly.

## Supplement Facts

Serving Size 3 Scoops (110 g)

Servings Per Container 13		
Amount Per Serving	% Dail	y Val
Calories	350	
Calories from Fat	45

You want to feed lean muscle, then you need muscle fuel... Amplified Muscle Meal. Our most complete sports nutrition product yet, packed full of nutrients your body needs throughout the day to fuel your toughest workouts. Developed by our sports nutrition experts, this is the ultimate muscle meal formula designed specifically for all competitive athletes.

Exclusive 50 Gram Protein Blend – Amplified luscle Meal is scientifically formulated with fast, medium and slow digesting proteins. This combination of multi-action proteins fuels your muscles with the protein you need for optimal growth and repair.\* Plus, it includes 20 grams of technology enhanced protein proven to get key amino acids into your blood better than ordinary whey protein! \* How? By using MicroSorb™ Amino fechnology, this protein has been pulverized, or "micronized," from large molecules into smaller particles that are easier to absorb. That means more amino acids are available for your muscles to

More Key Amino Acids - These micronized and non-micronized amino acids are delivered through advanced technologies and help create a dual flow of quick-absorbing aminos that are critical for protein synthesis. Each serving provides more than 9 grams of leucine, over 14 grams of glutamine and an array of amino acids to fuel skeletal muscles and provide an anti-catabolic effect.\*

Excellent Source of Fiber - It includes Sunfiber®, a clinically studied fiber, proven not to interfere with absorption of carbohydrates, fat and protein. Sunfiber® has also been proven to reduce glycemic

Tri-MG Infusion" - This anabolic amplifier consists of clinically studied betaine combined with HMB. This combination of ingredients creates an anti-catabolic effect for your muscles.\* Betaine. also known as trimethylglycine, is clinically shown to enhance athletic performance.\* HMB plays an important role in supporting muscle health during exercise by decreasing protein breakdown during resistance training.\* HMB is a metabolite of leucine which plays a key role in muscle performance and may also have an anti-catabolic effect.\*
