WEIGHT MANAGEMENT SYSTEM

GastrobiPlex® [SHAKE]

DIRECTIONS: Combine one (1) scoop of GastrobiPlex® Shake with 8 oz. of cold water, skim milk, almond milk, or juice of your choice. Mix thoroughly in a blender or shaker cup, add ice or fruit if using a blender for a more filling shake.

Enjoy one shake approximately 1 hour before major meals, or as a meal replacement if extra weight loss is desired. Limit intake to no more than two shakes per day.

GastrobiPlex® [SHAKE]

The International Bariatric Surgery Registry estimates 1 in 1,000 patients will die within four weeks of surgery and 3 in 1,000 will die within three months. ≠

The statistics above are what led trüDERMA to develop GastrobiPlex® Shake. Scientific research revealed that when certain natural fibers and proteins are combined and ingested you can achieve a similar effect to dangerous Bariatric surgery, with absolutely no side effects. GastrobiPlex® Shake is the safe and effective alternative that millions have been searching for.

GastrobiPlex® Shake is an all natural dietary supplement that makes weight management easier by helping you feel full sooner and longer. That feeling of "satiety" makes it easier to stick to your diet's meal plan by minimizing feelings of hunger during and after meals. You will simply eat less!

The active component in GastrobiPlex® Shake is a natural protein called Proteinase Inhibitor II (PI2). [P12] works by enhancing the body's release of cholecystokinin (CCK), a natural compound created during digestion that signals the brain that food has been eaten, which helps to create feelings of fullness and satisfaction.

GastrobiPlex® Shake has been specially formulated to have an incredibly delicious taste, while being low in calories. GastrobiPlex® Shake will not stimulate metabolism or cause jitters, bloating, or other side effects commonly associated with other weight management products.

GastrobiPlex® [CAPSULES]

Gastric Bypass And Other Bariatric Weight-Loss Surgeries Pose Serious Health Risks Including: Excessive Bleeding - Infection Blood Clots - Breathing Problems Adverse Reactions To Anesthesia - Gastrointestinal System Leaks - Death ≠

GastrobiPlex® Is A Safe Alternative To Surgery¶

The primary mechanism utilized in GastrobiPlex® Capsules supports "Healthy Weight Management" through enhancement of leptin function, and an increased feeling of fullness.* Leptin is a hormone produced by fat cells that regulates body weight. Normally, in healthy weight individuals, leptin crosses the blood-brain barrier to influence brain activity in the areas of satiety and appetite suppression. Leptin also boosts glycemic control and metabolism. In overweight and obese people, leptin production is high, yet its function is diminished because the body becomes resistant to it. Leptin resistance results in increased appetite, poor blood sugar balance, and slower metabolism. The primary ingredient in GastrobiPlex® Capsules has shown to lower leptin resistance and improve leptin function. This is a primary factor in GastrobiPlex's ability to promote weight-loss and fat reduction.
