* Daily value not established

Not a Significant Source of Dietary Fiber

* Percent Daily Values are based on a 2,000 calorie diet. Your Daily Values may be higher or lower depending on your calorie needs. ALLERGEN INFORMATION: Contains Milk and Soy (Lecithin) Ingredients

Ingredients: NitroPro® blend of Hydrolyzed Whey Protein Isolate, consisting of 75% (Hi-Tech) peptide-bound amino acids (PBAA's, Microfiltered Whey Protein Isolates, Ultrafiltered Whey Protein Isolate, Whey Protein Concentrate, Naturally Sweet™ (blend of erythritol, maltitol, maltodextrin, xylitol, tagatose, sucralose (<.0005 gm)), natural and artificial flavor, xanthan gum, cellulose gum

Suggested Use: Mix 3 scoops of NitroPro® in 8-10 ounces of water and/or beverage of choice. Drink 3-5 shakes per day for optimal nitrogen retention and muscle growth.

NitroPro® is the fastest, purest, most advanced whey protein we've ever developed. That's because it's made with 85% hydrolyzed whey protein as its primary protein source! By hydrolyzing the protein in this Revolutionary Formula we've created the fastest-acting whey protein yet. Hydrolyzing breaks larger proteins down into smaller pieces that are able to get into your system rapidly, enabling your muscles to start rebuilding immediately. **NitroPro®** also contains 15% of other high-quality proteins for "sustained release". This scientifically-designed ratio of proteins helps ensure maximum blood levels of amino acids-both PBAA's and BCAAs- to grow throughout the entire day. **NitroPro®** is assayed for purity and potency and is only made from the highest quality material available.

NitroPro® - THE MOST REVOLUTIONARY MUSCLE BUILDING PROTEIN YET!

By combining the absolute finest ingredients with a series of highly specialized processing techniques, Hi-Tech Pharmaceuticals has created its most revolutionary muscle-building protein yet. Everything about **NitroPro®** was designed with an uncompromising attitude toward human performance - both in the gym and in enhancing your physique. **NitroPro®** has enhanced absorption kinetics that shuttle large amounts of the amino acids essential for protein synthesis directly into muscle and other tissues.† This enhanced delivery system relieves the metabolic burden on muscle having to supply all organs and tissues with these amino acids.† This leaves a more potent supply of critical amino acids within muscle and promotes a more constant, uninterrupted state of protein synthesis, cell volume, and muscle anabolism.†

NitroPro® is protein in its purest sense. **NitroPro®** is made with 85% hydrolyzed whey proteins that have been isolated to remove excess lactose, cholesterol, carbohydrates, and fat. The result is a product that is ultra-pure, quickly digested, and packed with muscle-building and replenishing amino acids. NitroPro® is also the first protein to utilize a 75% PBAA composition formulation with a net protein or nitrogen utilization score of 92 out of 100. NitroPro has a Biological Value (BV) of 159, Protein Digestibility of 95, and a perfect 1.0 PDCAAS (Protein Digestibility Corrected Amino Acid Score).

HI-TECH PHARMACEUTICALS

ORANGE CREAMSICLE® - FLAVOR

NITROPRO®

DIETARY SUPPLEMENT

- NET NITROGEN UTILIZATION (NNU) OF 6 TIMES THAT OF ORDINARY WHEY!
- CONTAINS 75% PEPTIDE-BOUND AMINO ACIDS (PBAA'S), WHICH ELEVATE NITROGEN RETENTION BY 16X, COMPARED TO FREE-FORM AMINO ACIDS†
- REDUCES PROTEIN MOLECULES FROM 20,000 DALTONS TO 400-1,000 DALTONS- DRASTICALLY IMPROVING ABSORBABILITY!†
- POSSESSES AN/TN RATIO 500% GREATER THAN OTHER PROTEIN- EVISCERATING THE COMPETITION!†
- PROMOTES ANABOLISM BY SHUTTLE AMINO ACIDS ESSENTIAL FOR PROTEIN SYNTHESIS DIRECTLY INTO MUSCLE TISSUE!†

24G PROTEIN

20G PBAA'S

LOW IN FAT & CARBS

8G BCAAS

SCIENTIFICALLY-FORMULATED PROTEIN MAKES ALL OTHER PROTEINS OBSOLETE! TRY NITROPRO® AND "GET BACK" FROM YOUR PROTEIN WHAT YOU "PUT INTO" YOUR TRAINING!

SWEETENED WITH

NitroPro® was specifically developed for serious athletes and bodybuilders. **NitroPro®** is the first protein supplement to focus entirely on protein absorption, protein utilization-and ultimately, protein synthesis.† Nitro = Nitrogen balance... Pro = Protein Synthesis. **NitroPro®** is the first scientifically based protein ever developed. **NitroPro®** is Hi-Tech protein, literally! **NitroPro®** is crucial to the body's ability to build quality muscle tissue and strength.† **NitroPro®** is based upon 4 crucial protein technologies:

- 1) An increased Net Nitrogen Utilization (NNU) from the protein we ingest. NNU refers to protein synthesis and anabolism from protein. **NitroPro®** has a NNU of 6X normal whey.†
- 2) Consists of 75% Peptide-Bound Amino Acids (PBAA's), which are absorbed more quickly and increase nitrogen retention by 16x compared to free-form amino acids!†
- 3) Partial hydrolysis of protein with a proprietary process where systematically reduced protein molecules are abated from 20,000 Daltons in size to 400-1,000 Daltons.†
- 4) Possesses an AN/TN ratio 500% greater than other protein products, which causes **NitroPro™** to eviscerate the competition!†

NitroPro® utilizes a proprietary hydrolyzing technique to precise degrees. Hydrolyzing is a process in which intact proteins are strategically broken down into smaller fragments, called peptides, for faster delivery and easier utilization by your body. Hi-Tech's exclusive combination of mild, moderate, and ultra-hydrolyzed proteins results in di- and tri-peptides, while retaining select microfractions naturally found in whey. Every serving supplies even more low, moderate, and high molecular weight, biologically active whey protein microfractions including Alpha-lactalbumin, Glycomacropeptides, Beta-lactoglobulin, Immunoglobulin G (IgG), Lactoferrin, lactoperoxidase, and various growth factors. If this is too much scientific jargon, then all that you really need to know is that **NitroPro®** is precisely what you need first thing in the morning, before your workout, and immediately after your workout when your hard-working muscles benefit most from a fast-acting protein.

All proteins are made up of amino acids, but not all amino acids are of equal importance. The three BCAAs (leucine, isoleucine, valine) - are particularly beneficial for athletes because they assist with new muscle protein synthesis and protect the muscle that you already have against breakdown. Even more important is the amount of PBAA's. That's why every serving of **NitroPro®** has a whopping 8,000mg of BCAAs and 20,000mg of PBAA's. Make no mistake, **NitroPro®** is different than any supplement you may have tried. **NitroPro®** is formulated using state-of-the-art, cutting-edge protein technology. It's uniquely designed to accelerate the adaptation process of bodybuilding exercise.† Provide your body with protein scientifically suggested to dynamically increase explosive power, strength and lean muscle mass.†

When comparing protein supplements, you need to look no further than **NitroPro®**. There isn't another protein supplement available that can even compare to **NitroPro®** simply because **NitroPro®** totally annihilates the competition!
