

THE MOST POWERFUL PRE-WORKOUT PILL*

Peak SX-7™ is the most powerful pre-workout pill on the market today. Many pre-workout pills and powders give you energy and a "buzz," ...but how many can legitimately help you add lean muscle and extreme strength gains in just 12 weeks?^ Time to leave your old pre-workout behind.

How Does It Work?

Research suggests the key compound in Peak SX-7™ works using three distinct pathways. The first pathway helps increase blood flow to deliver more oxygen to hard-working muscles, allowing them to work even harder. The second mechanism of action is to help your muscles control ionic flux during contractions so they can recover and contract faster. The third and most important pathway of action is when Peak SX-7™ triggers the anabolic mTOR pathway – this puts your muscles in "musclebuilding" mode.▲

Subjects Increased Strength by 147% More Than Placebo Group in a 12-week Clinical Study

Researchers at the prestigious University of Tampa conducted a randomized, double-blind, placebo-controlled clinical study done over 12 weeks on very well-trained athletes.▲ The results were breakthrough!

MOST POWERFUL PRE-WORKOUT PILL

Subjects using the key compound in the Peak SX-7™ formula increased their total strength by an average of 121.9 lbs. in 12 weeks. The placebo group only increased by an average of 49.4 lbs. With Peak SX-7™ you'll get stronger and more powerful.▲
