

Fast Muscle Size & Strength Gains!

HICA-MAX™ Muscle Growth Stimulator

HICA-MAX™ is a powerful, natural stimulator of muscle growth.

HICA-MAX™ chewables contain 100% pharmaceutical grade leucic acid, also known as alpha-hydroxy-isocaproic acid (HICA), a natural metabolite of the branched chain amino acid, leucine.

Leucic acid has been shown in studies to massively increase protein synthesis (anabolism), and decrease muscle protein breakdown (catabolism) in athletes.¹

How HICA-MAX™ can help you:

- Create explosive gains in muscle and strength faster than ever before, without the negative side effects of steroids or prohormones.
- Rapidly accelerate recovery from workouts, so you can train more often.
- Reduce DOMS (Delayed Onset Muscle Soreness) allowing you to train harder.

HICA-MAX™ chewable tablets provide a cost-effective, result-producing daily dose of what may be the most powerful non-steroidal muscle growth stimulator in existence!

¹ Antti A Mero, et. al. Effects of alpha-hydroxy-isocaproic acid on body composition, DOMS, and performance in athletes. J Int Soc Sports Nutr. 2010; 5, 7(1):1.
