

Who Can Benefit from Taking Amplified Glutamine MicroFusion?™

Athletes with intense training regimens need extra support for muscle function and recovery.* Amplified Glutamine MicroFusion™ helps to fill this need and also supports anti-catabolic responses with its enhanced micronized formula. If you are serious about performance results, then Amplified Glutamine MicroFusion™ is the product for you!

When Should Amplified Glutamine MicroFusion™ be Taken?

Consume one serving immediately after workouts. For additional recovery support, take one serving daily.

What is Amplified Glutamine MicroFusion?™

Now one of the most popular amino acids is AMPed up for enhanced benefits, taking glutamine supplementation to the next level. Each 5 gram serving of glutamine has been micronized into smaller particles to facilitate faster absorption, which is further intensified with a patent-pending PEG-Glutamine system to maximize delivery potential. To AMP it up even more...the technology enhanced glutamine has been fused with our Dual GE Amplifier™, a clinically studied grape complex that has been clinically shown to enhance antioxidant protection giving you important recovery support needed after every intense training session.*

The Amplified Glutamine MicroFusion™ Evolution

This uniquely fused formulation is designed to optimize protein synthesis and enhance antioxidant protection through cutting-edge technology and scientific research and expertise:

Micronized Glutamine - This advanced glutamine is micronized using MicroSorb™ Amino Technology creating smaller particles that are easier to absorb. That means more glutamine can be available for your muscles to use as fuel! Involved in protein synthesis and hydrating muscle cells, levels of this important amino acid can be reduced with intense exercise. Supplementing with a more easily absorbable form of glutamine can help maintain glutamine levels in the muscle to help maximize muscle function.

Specialized Sports Antioxidant - Combat exercise-induced oxidative stress through a clinically studied grape complex shown to improve antioxidant status by 10% in athletes post-exercise!*** Important for the recovery process, this antioxidant protection works to fight free radicals that are created during strenuous exercise, which can cause damage to all cells, including muscle cells.*

*A study including 20 high level athletes in training and competition were evaluated on two separate occasions. On one occasion they used Dual GE Amplifier™ and the second occasion they took a placebo. Results concluded a 10% improvement in antioxidant levels in the blood when they took the Dual GE Amplifier™ compared to the placebo, revealing better antioxidant support.

GNC QUALITY COMMITMENT

GNC, the leader in the development and manufacture of dietary supplements, is committed to producing the highest quality products available. This commitment begins with quality designed supplement formulations. Every raw material that goes into a GNC supplement is guaranteed as to quality and potency. Each product is dated and then shipped immediately to our stores, so you can be sure you are purchasing the freshest supplements available. At GNC, we extend our quality commitment to you by offering our money back guarantee.

GNC GUARANTEE

Use any GNC supplement for as little as 10 days. If you are not 100% completely satisfied, return the unused portion of the product with proof of purchase to your GNC store for a complete refund of your purchase price. No questions asked!
