

Oligonol® is the world's first commercially produced low molecular weight polyphenol.

Produced by breaking down long-chain molecules into short-chain polymers, Oligonol can be easily absorbed by the body, giving it unmatched bioavailability and higher ORAC capacity than pomegranate, pine bark, grape seed and green tea.

Oligonol is derived from lychee – an exotic Asian super-fruit traditionally associated with beauty and longevity. Lychee also has the second highest total polyphenol content of any fruit on the planet.

Clinical studies indicate that Oligonol can help support vascular relaxation and cardiovascular health, reduce fatigue, slow the process of skin wrinkling and help reduce visceral fat.*

In 2008, Oligonol won the prestigious Nutracon award as "Top Science-Backed Product of the Year."
