The Evolution of Performance Supplementation

GNC's most advanced creatine formula, Amplified Creatine XXX™, has evolved even further with the launch of Amplified Creatine XXX™ Power, the line's first and only creatine formulated to help give you enhanced performance and strength.* This unique formula features an unstoppable blend of 4 key forms of creatine designed to provide an instant release of creatine and using the GNC exclusive Optimal Timing Technology (OT2™), a form that releases over 6 hours.

Advanced Creatine Complex & Creatine Precursor Compound

This breakthrough formula was created with the ultimate goal of enhancing athletic performance by combining powerful doses of clinically proven ingredients to provide the strength and power benefits of an advanced creatine blend.* Loaded with 4 unique creatine sources, including OT2™ creatine, creatine HCL, creatine ethyl ester and creatine citrate, this powerful formula helps increase strength and build lean muscle.* The OT2™ allows for a 6-hour extended release of creatine to feed your muscles before, during and after your toughest workouts to maximize your results.* To take you even further it's also packed with creatine precursors.

Power Complex

Combines agmatine with betaine anhydrous for added power and performance plus beta alanine to help buffer muscle carnosine levels, a key marker of muscle fatigue.* Features choline and CoQ-10. Choline is essential for making acetylcholine, a messenger chemical that is important in sending messages from one nerve cell to another. CoQ-10 is important for mitochondria function and is involved in the process that produces cellular energy and boosts ATP.*

Who can benefit from taking Amplified Creatine XXX™ Power?

Amplified Creatine XXX™ Power has re-engineered the use for creatine supplements. If your goal is to increase strength and power this formula is for you. You can customize your dosing and supplementation regimen to meet your specific training goals and nutrition needs.
