

Enhances Immune Function

Vitamin C plays a critical role in maintaining the body's natural antioxidant defense against cell damage, thereby supporting immune function. It is also key to maintaining tooth, gum, bone, muscle, and blood vessel health.

Since our bodies cannot make or store vitamin C, it needs to be replenished daily. Chewable Vita-C has a great citrus taste and each serving provides the vitamin C equivalent of 1½ oranges. It's ideal for children or anyone who has problems swallowing tablets.

Gluten free. No artificial flavors, sweeteners, colors, or preservatives added.

Bottle has printed seal under cap for your protection.
