

Modern science has identified in Maitake (*Grifola frondosa*) a proteoglycan, **Beta-1,3 glucan** and **Beta-1,6 glucans** combined with protein, as an active constituent to support the immune system.*

Maitake D-fraction® is a standardized form of the proteoglycan, specially developed to be optimal for oral administration.

This product contains **4** times more proteoglycan per tablet and provides **6** times more proteoglycan per serving compared to Maitake D-fraction® standard capsule.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.
