

Mushroom Wisdom has successfully isolated a substance (*amyloban*) from a mushroom called Lion's Mane (*Hericium erinaceum*) that supports healthy nerves and brain (Japanese patent 394,3399)*. Also, research indicates that other active compounds (*hericenones*) from the same mushroom may stimulate the production of Nerve Growth Factor (NGF) in the brain.*

Amyloban® 3399 is an advanced dietary supplement based on an innovative extract containing both of the above active substances which is developed by our research team with a collaboration of inventors in Japan, China and USA.
