

SUGGESTED USAGE: Take 1 ½ level teaspoons 3 times daily, or as directed by your healthcare practitioner.

HOW IT WORKS: Ribose is a pentose sugar found in all living cells and is a structural component of nucleotides such as DNA, RNA, and ATP.* ATP is the ultimate source of energy for all cells, and is necessary for all muscle movement.* D-Ribose has been clinically researched for its role in the support of adenosine triphosphate (ATP) production within skeletal muscle and for the maintenance of healthy cardiac energy metabolism.* These studies indicate that D-Ribose can help to sustain ATP production in these vital tissues.*

CAUTIONS/INTERACTIONS: D-Ribose may interact with drugs that affect blood sugar levels. Consult your healthcare practitioner before using this product if you are taking insulin, anti-diabetes medications, or other drugs that affect serum glucose levels, if you are diabetic or hypoglycemic, or if you are planning to undergo a surgical procedure.
