

SUGGESTED USAGE: Take 1 capsule 1 to 2 times daily, or as directed by your healthcare practitioner.

HOW IT WORKS: Quercetin is a dietary flavonol known for its ability to support a balanced immune system response.* Quercetin's benefits however, appear to be limited by its generally poor bioavailability. Enzymatically Modified Isoquercitrin is a water soluble form of Quercetin with greatly enhanced bioavailability.* According to pharmacokinetic data, its absorption is up to 40 times greater (Cmax) and reaches peak levels in the bloodstream in just 15 minutes.* Clinical studies show that Enzymatically Modified Isoquercitrin can support a balanced immune system and promote ocular comfort through temporary relief of itchy, watering eyes.*

CAUTIONS/INTERACTIONS: Quercetin may interact with anti-hypertensive medications, warfarin, and cyclosporin. Consult your healthcare practitioner before using this product if you are taking any of these medications or if you have any kidney dysfunction.

Do Not Eat Freshness Packet. Keep in Bottle.

Natural color variation may occur in this product.
