

USAGE: Take 1 to 3 delayed-release capsules (DRcaps®) per day 30 minutes before or after a meal, preferably dividing the capsules evenly among meals or as directed by your qualified healthcare professional.

The ingredients provided in one **BroccoMax®** delayed-release capsule have been demonstrated *in vitro* to yield approximately 8 mg of actual sulforaphane.

BroccoMax® contains a standardized amount of SGS, Sulforaphane Glucosinolate (a.k.a. Glucoraphanin), and uses a patented process that preserves myrosinase, the enzyme in broccoli that metabolizes SGS in the small intestine to the organosulfur isothiocyanate compound sulforaphane.

Sulforaphane is a potent inducer of Phase 2 detoxifying enzymes and helps protect cellular DNA.* Detoxification enzymes activated by sulforaphane are active as antioxidants and free radical scavengers in the tissues.*

NOTE: If you have a medical condition, are pregnant, lactating, trying to conceive, under the age of 18, or taking medications, consult your healthcare professional before using this product.

Keep out of the reach of children.
