CarboMax is a source of pure complex carbohydrates made from LCPF-50 Maltodextrin (long-chain polymetric fraction) for quick and sustained energy. CarboMax contains complex glucose polymers that are metabolized at a slow, steady rate in a time released fashion making it the smartest choice for athletes who want to increase energy, muscle endurance and mass without the complications of simple sugars. CarboMax can be used for pre-workout energy, post-workout recovery and throughout your workout to maintain high-energy levels.
