The All New SYNGEX® Protein with SRO™ – SpiroFuse Reverse Osmosis™

VPX® is proud to bring you a cutting edge NEW Whey Protein Isolate called, SpiroFuse Reverse Osmosis Filtration™ or SRO™! This invention is Whey Protein Isolate by SpiroFuse Reverse Osmosis Filtration™ or SRO™. Roughly 10 years ago **VPX®** was the first company ever to release a ceramic filtered Whey Protein Isolate supplement called micro flow microfiltration. This created quite a stir in the supplement industry because until that time only whey protein concentrate (WPC) or low grade Ion Exchange WPI was available. As you can imagine, there have been significant improvements in whey protein technology over the past 10 years. As a result of these superior scientific advancements, **VPX®** is utilizing super high tech new membrane systems that produce isolated proteins that are 99%+ pure and are ultra rich in potent low molecular weight micro-fractions (LMWF). **VPX®** is also using a new Whey Protein Concentrate that is designed to keep the fat globule portion of the protein intact which preserves the integrity of the naturally occurring IGF-1 and IGF-2. Consequently, **SYNGEX®** was born – a synergistic blend of the most cutting edge Whey Protein Isolate and Concentrate! The **SYNGEX®** flavoring system is also NEW and developed by **VPX®** flavor experts. These new potent protein and flavor technologies are only available inside of **SYNGEX®** and other **VPX®** protein products. **VPX®** is creating the future of muscle science, bodybuilding and performance enhancement for your success.

The most consistent and effective way to lose weight and unwanted body fat is by consuming a high protein/low carbohydrate diet (with moderate dietary fat intake). This is primarily due to the fact that protein has a spectacular three-phase assault on body fat: 1) protein causes the body to release a hormone called glucagon that frees up stored body fat to be used as energy, 2) protein builds muscle tissue – the site at which fat is burned; consequently, more muscle equals greater fat burning capacity, and 3) to digest protein the body has to expend a great deal of energy; this process is called the "thermic effect" of dietary protein. Protein produces by far the greatest thermic effect of any food.

While it is true that one of the keys to losing weight is to expend more calories than we consume, the most important secret for long term fat and weight loss is to control the hormone insulin. Insulin release is consistent with the amount and/or type of carbohydrates we consume. This hormone causes our body to store fat and can prevent stored body fat from being utilized as energy. However, if we control insulin with a low carbohydrate diet, we can also reduce our body weight and body fat. SYNGEX® Protein is a synergistic blend of Whey Protein Isolate & Concentrate and can be utilized to supplement any type of low-carbohydrate diet. Protein is unquestionably the single most important nutrient for dramatically redefining and improving your physique. Do what many of the greatest professional athletes, bodybuilders and movie stars have done – make VPX® an integral part of your supplementation program today!

Iron	<1 mg 2%
Magnesium	10 mg 4%

*Percent Daily Values are based on a 2,000 calorie diet.
**Daily Values have not been established for this amount of calories, or vitamin A.

Other Ingredients:
superfilters (bioactive protein matrix: whey protein concentrate, whey protein isolate, natural & artificial flavors, sucralose, acesulfame potassium, xanthan gum and sunflower pectin/oil.

Contains:
Milk and soy (an soy lecithin).

Allergen Warning:
Produced in a facility that processes milk, egg, soy, wheat, tree nuts and peanut.

DIRECTIONS FOR USE: For a great tasting, delicious shake combine each scoop of SYNGEX® Protein with 4 to 6 ounces of cold water (depending on personal preference for desired thickness). For added body blend two or three ice cubes with SYNGEX®. Use 2-3 servings daily. Always drink 12 to 16 ounces of additional water for each protein shake consumed.

100% WHEY PROTEIN
THE POWER OF SYNGEX® W/ SRO™

New SRO™ Whey Protein Isolate as SPIROFUSE REVERSE OSMOSIS™ Whey Protein Isolate by Reverse Osmosis Spirofuse Filtration™!
Intact Fat Globule IGF Rich Whey Protein Concentrate!
Rich in Bio-Active Protein Micro-Fractions!
Awesome taste engineered by VPX flavor experts!

ZERO Corn Syrup Solids Or Hydrogenated Oils
ZERO Fat-promoting High Glycemic Index Maltodextrins
ZERO Casein, Ion Exchange or Other Old-School Proteins
ZERO Estrogen Promoting Inferior Soy Proteins

GMP | GF | GMO
