

CLA (Conjugated Linoleic Acid) is a targeted, stimulant free solution to help maximize your fitness efforts, reduce body fat and increase lean muscle mass. Studies suggest CLA works by increasing your metabolic rate to help burn calories and pushing glucose (blood sugar) into muscle cells instead of letting it turn into body fat.

CLA, when used in conjunction with a regimented diet and exercise plan, helps you get the muscle tone you want. CLA can also be stacked with additional weight management products.*

OLYMPIAN LABS, INC. products are made with the highest quality ingredients and manufactured according to current Good Manufacturing Practices (cGMP).

CAUTION: If you are pregnant or nursing, have a medical condition, or are taking medication, consult your healthcare professional before using this or any other nutritional supplement. Discontinue use if allergic reaction occurs.
