

ESR pairs two amino acids together, Arginine & Ornithine, in a specific ratio that may increase the release of the human growth hormone (HGH) in your body. HGH is required for optimum muscle growth and repair. This pairing also helps increase Nitric Oxide (NO) production which causes blood vessels to expand, allowing greater blood flow to working muscles. This delivers more oxygen, blood, and nutrients to working and/or recovering muscles.*

OLYMPIAN LABS, INC. products are made with the highest quality ingredients and manufactured according to current Good Manufacturing Practices (cGMP).

CAUTION: If you are pregnant or nursing, have a medical condition, or are taking medication, consult your healthcare professional before using this or any other nutritional supplement. Discontinue use if allergic reaction occurs.
