

Sunflowers are naturally rich in the powerful fat-soluble antioxidant Vitamin E. This essential vitamin helps protect cells from oxidative damage by scavenging free radicals. When combined with a healthy diet and lifestyle our **SUNFLOWER E 400 IU** can neutralize excess free radicals that come from daily activities and environmental exposures, and it has been shown that natural Vitamin E is significantly more effective than synthetic forms.<sup>†</sup> Most Vitamin E comes from soy which is a common allergen. We are pleased to offer a sunflower based softgel alternative for those who need Vitamin E.
