

No vitamin routine should be without the antioxidant protection offered by vitamin C. Because our bodies cannot produce vitamin C, it needs to be replenished on a daily basis. Vitamin C is crucial in the production of collagen, which helps build blood vessels, tendons, ligaments and bones. It helps create neurotransmitters that control mood, and carnitine which helps shuttle fat to the mitochondria for energy production. It has also been suggested that vitamin C may help with lead detoxification. As an antioxidant, it prevents free radicals from damaging cells and DNA. What's more, it may be able to regenerate the antioxidant vitamin E.

Our **Vitamin C Crystal Powder** is derived from IPP non-GMO corn certified free of melamine, cyanuric acid and pesticides.
