

Collagen is an essential structural component of the skin, a protein that connects and supports bodily tissue. Collagen production declines with age, thus contributing to wrinkling, sagging and discoloration. This supplement contains 3 types of collagen peptides (I, II & III), the most abundant forms in the human body and essential for healthy, young-looking skin. **Chondroitin sulfate** is an important structural component of cartilage and provides much of its resistance to compression. **Hyaluronic acid** is a major component of skin cells that is involved in tissue repair and helps to maintain moisture. Our **Health and Beauty Blend** includes potent antioxidants that fight free radicals and help avoid damaged skin and premature aging. **Vitamin C**, in addition to its antioxidant properties, plays an integral role in collagen synthesis for ageless beauty.[†]
