Ginkgo Biloba contains two groups of active components: Flavone glycosides (unique bioflavonoids) and terpene lactones. The flavone glycosides help protect against oxidative damage to the brain tissues, improve circulation to the brain and support memory function. The terpene lactones assist in promoting healthy circulation and healthy Our Ginkgo Biloba conforms to dosage and mode

of administration as established by the German standardized Ginkgo Biloba (Ginkgo biloba) extract powder from the highest grade whole leaves t mate Extract® process makes our Girikgo Biloba cowder, resulting in a premium supplement

to digest and more available than plain herb
