Whey supports the body's ability to maintain, increase, and repair muscle by absorbing and retaining nitrogen. It also provides the milk proteins. B-lactoglobulin, A-lactalbumin, immunoglobulin, glycomacropeptide, and lactoferrin, which are important for immune system function.†

Whey surpasses even whole eggs in its ability to deposit nitrogen in the muscle. Our Whey Protein Powder product has highly bigavailable undenstured protein and Branched Chain Amino Acids (BCAA's), making it ideal to promote muscle repair, maintenance and growth. The free-form amino acid glutamine has been added to further support muscle health.†

Our proprietary process uses only natural vegetarian enzymes and high quality membrane filters to separate the whey and preserve the essential nutrients. This state-of-the-art processing using low temperatures creates a complete spectrum of whey peptides, improving nitrogen retention, supporting immune system health, and providing antioxidant protection. Whey supports cellular glutathione levels, one of nature's important antioxidants. The Fair Trade, organic cocoa in our product uses cocoa beans harvested from the Yacao cooperative in the Dominican Republic.†
