

Sytrinol[®]

Patented Bioflavonoid Complex

Sytrinol[®] is a unique blend of bioflavonoids (*polymethoxylated flavones*) and tocotrienols extracted from citrus and palm fruits.

Cholesterol and Triglyceride Control[‡]

Sytrinol[®] helps maintain levels already within the normal range by supporting healthy cholesterol and triglyceride production.

*This statement has not been evaluated by the Food & Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

‡Sytrinol[®] is a registered trademark of NPI, LLC.

What is Cholesterol?

Cholesterol is a waxy, fat-like substance needed for certain body functions.

- **Did you know?** The liver produces up to 75% of the body's cholesterol. Food in the daily diet is another source of cholesterol.

Healthy Cholesterol Levels

Total cholesterol levels in the blood should be less than 200 mg/dL. The two primary types of cholesterol are:

- 1) **HDL cholesterol**, which is "good" because it helps remove cholesterol from the blood. Levels above 40 mg/dL are healthy.
- 2) **LDL cholesterol**, which is "bad." Levels below 100 mg/dL are optimal for cardiovascular health.

What are Triglycerides?

Triglycerides are another type of fat in the blood. Levels below 150 mg/dL are considered normal.
