

Suggested Usage: Take 1 capsule daily on an empty stomach. Take with 8 oz. of water, 30 minutes before a meal.

NADH (Reduced Nicotinamide Adenine Dinucleotide) is a coenzyme found in all living cells that is derived from Vitamin B-3, also known as Niacin.* NADH is an essential cofactor for hundreds of biochemical reactions, and is used extensively in the production of cellular energy (ATP).* NADH also plays a notable role in the synthesis of neurotransmitters in the brain.* Although NADH is normally unstable outside of the body, PANMOL® NADH uses a patented process to naturally preserve its effectiveness, thereby delivering stable and bioavailable NADH to the body.*
