

A high potency, comprehensive enzymatic digestant that supplements the body's natural secretion of enzymes. Includes naturally occurring plant-derived enzymes that provide a broad range of activity across the full pH spectrum normally found in the intestinal tract. Tablets are enteric coated to protect contents from stomach acid and ensure enzyme release in the intestines.

Protease catalyzes protein into amino acids. Amylase aids carbohydrate breakdown into saccharides. Lipase, bile salts and dehydrocholic acid help prepare dietary lipids for absorption. Ox bile and dehydrocholic acid facilitate lipase activity and support thorough fat digestion. These digestive agents promote healthy, stress-free digestion and optimum nutrient availability.*

Store in a cool, dry place, away from direct sunlight.

Packaged with safety seal.
