

 Human MicroFlora (HMF) probiotic strains are research-driven and clinically proven in randomized, double-blind, placebo-controlled human trials at 25 billion CFU per day. Proprietary non-pathogenic human-sourced microflora bacterial strains are utilized as they have strong epithelial adherence and a naturally high tolerance to stomach acid.

Recommended Dose: Adults, Adolescents and Children (3 years and older): In a glass, add water or milk to one scoop of HMF Intensive Powder and mix. Take once daily with a meal, at least two to three hours before or after taking antibiotics, or as recommended by your healthcare practitioner.

Risk Information: If you have an immune compromised condition, do not use. If symptoms of digestive upset occur, worsen or persist beyond three days, discontinue use and consult your healthcare practitioner. **Guaranteed** to contain no added wheat, gluten, soy, sodium, artificial coloring or flavoring, antimicrobial preservatives, dairy or animal products. Ideal for vegans. **Quality Assurance:** Vacuum-sealed for your protection and for product freshness. Do not use if outer seal is missing or broken. Store under refrigeration (below 46 °F).
