

Human MicroFlora (HMF) probiotic strains were studied in a randomized, double-blind, placebo-controlled human trial at 10 billion CFU per day. Proprietary non-pathogenic, human-sourced microflora bacterial strains are utilized as they have strong epithelial adherence and a naturally high tolerance to stomach acid.

Recommended Dose: Children (1-4 years): In a glass, add water or milk to one scoop of HMF Baby F and mix. Take once daily with a meal, at least two to three hours before or after taking antibiotics, or as recommended by your healthcare practitioner. **Risk Information:** If you have an immune compromised condition, do not use. If you are experiencing fever, vomiting, bloody diarrhea or severe abdominal pain, consult your healthcare practitioner prior to use. If symptoms of digestive upset occur, worsen or persist beyond three days, discontinue use and consult your healthcare practitioner. **Guaranteed** to contain no added wheat, starch, gluten, soy, artificial coloring or flavoring or antimicrobial preservatives. Ideal for vegetarians. **Quality Assurance:** Vacuum sealed for your protection and for product freshness. Do not use if outer seal is missing or broken. Store under refrigeration (below 46 °F).
