

Total body hydration is a major factor in overall health, performance and recovery. Drinking the commonly recommended 6-8 glasses of water a day may not ensure deep tissue hydration and will not replenish lost electrolytes. **HFX Hydration Factor®** was developed and scientifically formulated to effectively provide your body with overall hydration and replace lost electrolytes.**

Supporting cellular hydration is the single greatest step anyone can take toward improving energy, wellness and endurance.** This requires not only drinking water, but ensuring the water you drink makes it into your cells. **HFX uses a patented technology** of natural ingredients proven to increase cellular hydration better than drinking water alone.**

Non-Training Day: 16 oz water with 1 scoop HFX

Training Day: 32 oz water with 2 scoops HFX

Competition Day: 48 oz water with 3 scoops HFX
